ARC Trooper Commander - Havoc

Model AR 3440, Photo by Ashley Broomhall

Description: ARC Trooper - Havoc

Prefix: AR

Detachment: Clone Trooper Detachment

Context: The Clone Wars: Season 3

Havoc is an ARC trooper commander serving in the Rancor Battalion.

Please note that this costume is also eligible for membership in The Rebel Legion.

The 501st approval requirements are listed in black.

In the page below, items listed in blue are recommended features that will improve the quality of the costume. Items listed in red are intended to further enhance the finished costume.

For 501st membership only the requirements in black need to be met.

IMPORTANT: Effective June 1 2012, the 501st will no longer be approving realistic interpretations of Clone Wars CG characters. The armor sculpt must match the character being recreated. See [this thread at clonetroopers.net](#) for the differences between the sculpts.

Required Costume Components

The following costume components must be present and appear as described below for approval .

Helmet

For 501st approval:

- Helmet is to be painted with a base color of matte or satin white.

Optional Accessories

Items below are optional costume accessories. These items are not required for approval, but if present must meet the guidelines below.

DC-17 Hand Blaster (animated style)
For 501st approval:

- This is the animated variant of the DC-17 blaster. Manufactured by BlasTech Industries, DC-17 pistols are designed for use as secondary weapons. Because they are widely recognized for their high stopping power and firing rate, many battlefield officers use them as primarily combat weapons.

DC-15S Blaster Carbine (animated style)
For 501st approval:

This is the animated variant of the DC-15S blaster rifle. Manufactured by BlasTech Industries, this weapon is commonly carried by the Troopers of the Galactic Republic.
